IHC/MM 84-100
10 December 1984

MEMORANDUM FOR: Mr. Frank McNeil
Deputy Assistant Secretary for
Intelligence and Research
Mr. Jim Fazio, INR
Mr. William Mulligan, INR/C
Department of State

STAT

FROM:
Vice Chairman, Information Handling Committee

SUBJECT: DOS/INR Information Handling Study - Phase II

1. The IHC staff has reviewed the October 1984 draft of the INR Information Handling Study Phase II Recommendations document and provided comment to Mrs. Eileen Vanderburgh on December 5th. In addition a copy of our comments are being provided to you for your review and retention.

2. Following an extensive evaluation, it is our conclusion that we cannot agree with Planning Research Corporation's principal recommendation, i.e., that INR select the option denominated "Commercial System Architecture," given the analysis that now exists to substantiate that recommendation. Further, it is our opinion that all three options should continue to be considered as "potential candidates" until further detailed analysis and refinement has been accomplished and INR has sufficient information on which to select one of the options for implementation.
